

ABDULLAH AL NOMAN

Bashundhara R/A, Dhaka, Bangladesh | 01722095147 | abdullahnoman2145@gmail.com

PROFESSIONAL SUMMARY

Motivated final-semester Computer Science & Engineering student at American International University-Bangladesh (AIUB) with hands-on experience in programming, database management, web technologies, artificial intelligence, machine learning, data science, GIS-based spatial analysis, and embedded systems. Built multiple academic and research projects using Python, Java, C++, PHP, JavaScript, MySQL, R, HTML/CSS, and Arduino-based technologies, including a Hospital Management System, Document Type Detection, Diabetes Prediction, Thief Detection System, and Voronoi Diagram-based utility service accessibility analysis. Known for problem-solving, adaptability, and a strong willingness to learn. Seeking an internship opportunity to apply hands-on technical experience, contribute to real-world projects, and develop as a professional software engineer.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, PHP, JavaScript, R

Web Technologies: HTML, CSS, JavaScript, PHP

Database: MySQL

AI & Machine Learning: Artificial Intelligence, Machine Learning, Natural Language Processing (NLP), BERT, Transformer Models, Predictive Analysis

Data Analysis: RStudio, Data Processing, Data Visualization

GIS / Spatial Analysis: Voronoi Diagrams, Utility Service Accessibility Analysis

Core Computer Science: Object-Oriented Programming, Data Structures & Algorithms, Database Management, Operating Systems, Computer Networks, Software Engineering, Microprocessor & Embedded Systems, AVR Assembly

PROJECTS

Hospital Management System

Tech Stack: C# | MySQL | Database Management

- Developed a database-driven Hospital Management System using C# and MySQL.
- Applied C# programming concepts to implement system functionality and application-level operations.
- Designed and managed relational database structures for patient and hospital-related information.

Netflix Movie Streaming & Request Platform

Tech Stack: HTML | CSS | JavaScript | PHP | MySQL | Web Technologies

- Developed a Netflix-style web-based movie streaming platform using HTML, CSS, JavaScript, PHP, and MySQL.
- Developed PHP and MySQL functionality for managing movie information, users, and movie requests.
- Implemented a movie request feature that allows users to request movies that are not available on the platform.
- Designed a user-friendly interface where users can browse movies, view movie details, and watch available movies.
- Applied CRUD operations and database connectivity for efficient movie and request management.

Dhaka Utility Services Accessibility Analysis

Tech Stack: GIS | Voronoi Diagrams | Spatial Analysis

- Conducted a spatial analysis project to examine utility service accessibility using Voronoi Diagrams.
- Analyzed service coverage and identified accessibility gaps across different areas of Dhaka City.
- Worked with spatial data to evaluate the distribution and accessibility of essential public services.

Document Type Detection

Tech Stack: Python | NLP | BERT | Transformer Models | Machine Learning

- Developed an AI-based document type detection system using Natural Language Processing (NLP) techniques.
- Utilized BERT (Bidirectional Encoder Representations from Transformers) for document classification.
- Applied text preprocessing and Transformer-based techniques for document understanding and classification.

Diabetes Prediction

Tech Stack: Python | Artificial Intelligence | Machine Learning

- Developed a machine-learning project focused on diabetes prediction.
- Performed data processing and applied machine-learning techniques for predictive analysis.

Advance Thief Detection

Tech Stack: Arduino | AVR Assembly | Ultrasonic Sensor | LCD | LED

- Developed an embedded security system to detect unauthorized movement using an ultrasonic sensor.
- Integrated an LCD display and LED indicator to provide real-time detection and alert status.
- Implemented sensor-based monitoring logic for identifying movement within a defined range.

Data Analysis Project

Tech Stack: R | RStudio

- Completed an academic data-analysis project using R and RStudio.
- Applied data processing, analysis, and visualization techniques to work with datasets.

EDUCATION

B.Sc. in Computer Science & Engineering

American International University-Bangladesh (AIUB) | Final Semester

Relevant Coursework: Object-Oriented Programming, Data Structures, Algorithms, Database Systems, Software Engineering, Web Technologies, Computer Networks, Computer Graphics, Operating Systems, Artificial Intelligence and Expert Systems, Machine Learning, Introduction to Data Science, Natural Language Processing, Management Information Systems (MIS), Computer Vision and Pattern Recognition.

EXPERIENCE

Academic Project & Research Experience

Hands-on experience through university coursework, software development projects, AI/ML projects, data analysis, and thesis research involving programming, databases, machine learning, and spatial analysis..

- Collaborated effectively in group-based academic projects, coordinating tasks, sharing responsibilities, and contributing to successful project completion.

LANGUAGES

Bangla, English
